

Cincinnati Children's Inpatient Daily Census Report

Cincinnati Children's Confidential Information. Please Do Not Distribute.

Effective **1/8/24**, the determination of system level Red/Yellow/Green for capacity has been updated as well as for all inpatient sites of care. The previous capacity assessment was not aligned with organizational growth and budgeted capacity resulting in an overestimate of system stress and a high frequency of red status at the system and unit levels. The updated system assesses capacity in terms of Acute Care (including Base, Liberty and Hem/Onc/BMT), Critical Care and Mental Health (excluding residential care) with defined thresholds that will identify red status requiring Site of Care and System level mitigation, yellow status that has a focus on unit mitigation and green status (normal operations).

Daily Census Report (4/29/24)

Total Census

517

Acute Care

73%
(293/392)

Critical Care

71%
(131/183)

Inpt. Mental Health
